SECTION I

INTRODUCTION

1. Scope

This manual lists repair parts and special tools required for the performance of Direct and General Support Maintenance (including depot maintenance allowances) of the engine and associated parts for the military model LDS-427-2 Engine.

2. General

This Repair Parts and Special Tools List is divided into the following sections:

a. Repair Parts List—Section II. A list of repair parts authorized at the direct and general support levels for the performance of maintenance, (including depot maintenance allowances). The list also includes parts which must be removed for the replacement of the authorized parts. Parts lists are composed of functional groups in ascending numerical sequence, with parts in each group listed in figure and item number sequence.

NOTE

(Assembly components and subassemblies are indented under major assemblies.)

b. Special Tools List—Section III. A list of special tools and test equipment authorized for the performance of maintenance at the direct and general support levels. (Including depot maintenance allowances).

c. Federal Stock Number and Reference Number Index—Section IV. A list, in ascending numerical sequence of all Federal stock numbers appearing in the listings, followed by a list in alphameric sequence, of all reference numbers appearing in the listings. Federal stock numbers and reference numbers are corss-referenced to each illustration figure and item number appearance.

3. Explanation of Columns

The following provides an explanation of columns found in the tabular listings.

a. Source, Maintenance and Recoverability Codes (SMR) of the Uniform SMR Code format are listed in Column 1 in five positions as follows:

(1) *Source codes.* The Source Codes are entered in the first and second positions and are assigned to support the items for maintenance, repair, or overhaul of end items. Source codes are defined as listed below.

Code	*Definition*
PA	Item procured and stocked for anticipated or known usage.
PB	Item procured and stocked for insurance purpose because essentiality dictates that a minimum quantity be available in the supply systems.
PC	Item procured and stocked and which otherwise would be coded PA except that it is deteriorative in nature.
PD	Support item, excluding support equipment, procured for initial issue or outfitting and stocked only for subsequent or additional initial issues or outfittings. Not subject to automatic replenishment.
PE	Support equipment procured and stocked for initial issue or outfitting to specified maintenance repair activities.
PF	Support equipment which will not be stocked but which will be centrally procured on demand.
PG	Item procured and stocked to provide for sustained support for life of the equipment. It is applied to an item peculiar to the equipment which, because of probable discontinuance or shutdown of production facilities would prove uneconomical to reproduce at a later time.
KD	An item of depot overhaul / repair kit and not purchased separately. Depot kit is defined as a kit that provides items required at the time of overhaul or repair.
KF	An item of a maintenance kit and not purchased separately. Maintenance kit is defined as a kit that provides an item that can be replaced at organizational or intermediate levels of maintenance.
KB	Item included in both a depot overhaul / repair kit and a maintenance kit.
MO	Item to be manufactured or fabricated at organizational level.
MF	Item to be manufactured or fabricated at the direct support maintenance level.
MH	Item to be manufactured or fabricated at the general support maintenance level.
MD	Item to be manufactured or fabricated at depot maintenance level.
AO	Item to be assembled at organizational level.
AF	Item to be assembled at the direct support maintenance level.
AH	Item to be assembled at the general support maintenance level.
AD	Item to be assembled at depot maintenance level.
XA	Item is not procured or stocked. The requirements for the item will be filled by replacement of the next higher assembly or component.
XB	Item is not procured or stocked. If this item is not available through salvage, it is to be requisitioned.
XC	Installation drawing, diagram, instruction sheet, field service drawing that is identified by manufacturer's part number.
--	A low-mortality item that is not stocked. When required, requisition the item from the end item manager with exception data, using the manufacturer s code and part number.

NOTE

Cannibalization or salvage may be used as a source of supply for any items coded above except those coded XA and aircraft support items as restricted by AR 700-42.

(2) *Maintenance code.* Maintenance codes are entered in the third and fourth positions. They indicate the level of maintenance authorized to Use and Repair the support item as defined below.

(a) Use. This maintenance code entered in the third position indicates the lowest maintenance level authorized to remove, replace, and use the support item. The Use maintenance level is indicated by one of the codes defined below.

Code	*Explanation and Application*
C	Crew or operator maintenance performed within organizational maintenance.
O	Support item is removed, replaced, used at the organizational level.
F	Support item is removed, replaced, used at the direct support level.
H	Support item is removed, replaced, used at the general support level.
D	Support item is removed, replaced, used at Depot, Mobile Depot, Specialized Repair activity only.

(b) Repair. This maintenance code entered in the fourth position indicates whether the item is to be repaired. It identifies the lowest maintenance level with the capability to perform complete repair of all authorized maintenance functions. This position contains one of the following maintenance codes assigned by the service(s) that require the code as defined below.

Code	*Explanation and Application*
O	The lowest maintenance level capable of complete repair of the support item is the organizational level.
F	The lowest maintenance level capable of complete repair of the support item is the direct support level.
H	The lowest maintenance level capable of complete repair of the support item is the general support level.
D	The lowest maintenance level capable of complete repair of support item is the depot level, performed by Depot, Mobile Depot, or Specialized Repair Activity.
L	Repair restricted to designated Specialized Repair Activity.
Z	Non-reparable. No repair is authorized.
B	No repair is authorized. The item may be reconditioned by adjusting, lubrication, etc., at the user level. No parts or special tools are procured for the maintenance of this item.

(3) *Recoverability code.* This code is entered in the fifth position. It is assigned to a support item to indicate the disposition action on an unserviceable item. This fifth position contains one of the codes defined below.

Code	*Definition*
Z	Nonreparable item. When unserviceable, condemn and dispose at the level indicated in third position (Use).
O	Reparable item. When not economical to repair, condemn and dispose at organizational level.
F	Reparable item. When not economical to repair, condemn and dispose at the direct support level.
H	Reparable item. When not economical to repair, condemn and dispose at the general support level.
D	Reparable item. When beyond lower-level repair capability, return to depot. Condemnation and disposal not authorized below depot level.
L	Reparable item. Repair, condemnation and disposal not authorized below Depot / Specialized Repair Actitvity level.
A	Item requires special handling because of specific reasons (i.e., precious metal content, high dollar value, critical material, or hazardous material). Refer to appropriate manuals / directives for specific instructions.

b. Federal Stock Number, Column 2. Indicates the Federal stock number assigned to the item and will be used for requisitioning purposes.

NOTE

Federal Stock Numbers that are missing for PA or PB source-coded items are not currently recorded in the AMDF. When these stock numbers are broadcast in the AMDF they will be provided by a change to this manual.

c. Description, Column 3. Indicates the Federal item name and a minimum description required to identify the item. The last line indicates the reference number followed by the applicable Federal Supply Code for Manufacturer (FSCM) in parentheses. The FSCM is used as an element in item identification to designate manufacturer or distributor or Government agency, etc., and is identified in SB 708-42. Items that are included in kits and sets are listed below the name of the kit or set with quantity of each item in the kit or set indicated in front of the item name. Material required for manufacture of fabrication is identified.

d. Unit of Measure (U / M). Column 4. Indicates the standard or basic quantity by which the listed item is used in performing the actual maintenance function. This measure is expressed by a two-character alphabetical abbreviation, e.g., ea, in, pr, etc., and is the basis used to indicate quantities and allowances in subsequent columns. When the unit of measure differs from the unit of issue, the lowest unit of issue that will satisfy the required units of measure will be requisitioned.

e. Quantity Incorporated in Unit, Column 5. Indicates the quantity of the item used in the functional group. A "V" appearing in this column in lieu of a quantity indicates that a definite quantity cannot be indicated (e.g. shims, spacers, etc.).

f. 30-Day DS / GS Maintenance Authorization, Columns 6 and 7.

(1) The Repair Parts List includes asterisk (*) entries in separate columns—one for Direct Support (DS) and one for General Support (GS)—

as appropriate to indicate the total range of repair parts authorized for use at that category or required to be removed or disassembled during the performance of authorized maintenance operations. They will be requisitioned initially on an "as required" basis. The repair parts authorized at the DS / GS levels will be those authorized for the maintenance mission at these levels. Requirements for repair parts stockage and for distribution to support units will be based on demand and determined in accordance with AR 710-2.

(2) Special Tools or Test, Measurement and Diagnostic Equipment (TMDE) and other support equipment peculiar to an item are listed with quantities in the appropriate density spread / allowance columns.

g. 1-Year Allowances per 100 Equipments / Contingency Planning Purposes, Column 8. This column indicates the requirement for contingency planning purposes. An asterisk (*) indicates authorization to obtain or use as required.

h. Depot Maintenance Allowances per 100 Equipments, Column 9. This column indicates authorization for depot use.

i. Illustrations, Column 10. This column is divided as follows:

(1) *Figure Number, Subcolumn (a).* Indicates the figure number of the illustration in which the item is shown.

(2) *Item Number, Subcolumn (b).* Indicates the callout number used to reference the item in the illustration.

4. Special Information

a. Identifications of the usable on codes included in Column 3 of this publication are:

Code	*Used On Serial No's*
A	1001 through 5968
B	2938 and up
C	1001 through 2937
D	1001 through 6535
E	6536 and up
F	1001 through 5864
G	5865 and up
H	6550 and up
J	1001 through 6550
K	6551 and up
L	1001 through 2515
M	2516 through 5864
N	2865 and up
P	2516 and up
R	5865 through 6570
S	6571 and up

Uncoded items are applicable to all models.

b. Bulk materials required to manufacture items are listed in the Bulk Materials Group of this manual.

c. Parts which require manufacture or assembly at a category higher than that authorized for installation will indicate in the source column the higher category.

d. The following publications pertain to the Engine and components.

TM 9-2910-226-35	Direct Support, General Support and Depot Maintenance Manual (including repair parts and special tools lists) for Pump, Fuel, Metering and Distribution (2910-017-9778 and 2910-759-5410) American Bosch Model PSB6A.
TM 9-2990-201-45	General Support and Depot Maintenance Manual (including repair parts and special tools lists) for turbocharger, engine (2990-074-8930, Schwitzer Model 4-456), (2990-974-7583, Schwitzer Model 4D-554), (2990-967-9909, Schwitzer Model 4D-454C), (2990-999-2275, Schwitzer Model 4LE-354,), and (29501178-1245, Schwitzer Model 4LE-456).
TM 9-2920-247-34	Direct Support, General Support, (including repair parts and special tool lists) for Generator Assembly (2920-903-9534, Prestolite Model GHA-4804-JUT).
TM 9-2920-214-35	Direct Support, General Support and Depot Maintenance Manual (including repair parts and special tool list) for Generator Assembly (2920-735-5736, Delco-Remy Model 1117495.
TM 9-2920-236-35	Direct Support, General Support and Depot Maintenance Manual (including direct support, general support and depot maintenance repair parts list) for Starter,

	Engine, Electrical, Auto-Lite Model MBD-4044UT (2920-763-2346)
TM 9-2920-242-35	Direct Support, General Support and Depot Maintenance Manual (including repair parts) for Starter, Engine, Electrical, 2920-226-6545 (Delco-Remy Model 1113943) (Military part number 10911018-1) Starter, Engine, Electrical, 2920-911-5637 (Delco-Remy Model 113904) (Military part number 10911018) Starter, Engine, Electrical, 2920-912-9510 (Delco-Remy Model 1113944)
TM 9-2920-243-34	Direct Support and General Support Maintenance Manual (including repair parts and special tools list with depot maintenance allowance) for Starter, Engine, Electric, Leece-Neville Model M0017072-MB (2920-267-9987)
TM 9-2920-248-35	Direct Support, General Support and Depot Maintenance Manual (including repair parts) for Starter, Engine, Electrical, 2920-999-6216 (Prestolite Model MFY6101AUT)

5. How to Locate Repair Parts

a. When Federal stock number or reference number is unknown:

(1) *First.* Using the table of contents determine the functional subgroup within which the repair part belongs, (i.e., engine, engine assembly, transmission, transmission assembly). This is necessary since illustrations are prepared for functional subgroups and listings are divided into the same groups.

(2) *Second.* Find the illustration covering the functional subgroup to which the repair part belongs.

(3) *Third.* Identify the repair part on the illustration and note the illustration figure and item number of the repair part.

(4) *Fourth.* Using the Repair Parts Listing, find the functional subgroup to which the repair part belongs and locate the illustration figure and item number noted on the illustration.

b. When the Federal stock number or reference number is known:

(1) *First.* Using the index of Federal Stock Numbers and Reference Numbers find the pertinent Federal stock number or reference number. This index is in ascending FSN sequence followed by a list of reference numbers in ascending alphameric sequence, cross-referenced to the illustration figure number and item number.

(2) *Second.* Using the Repair Parts Listings, find the functional subgroup of the repair part and the illustration figure number and item number referenced in the Index of Federal Stock Numbers and Reference Numbers.

6. Recommendations for Maintenance Publications Improvements.

You can improve this manual by calling attention to errors and by recommending improvements, usind DA Form 2028 (Recommended Changes to Publications) or by a letter, and mailing directly to Commander, US Army Tank-Automotive Command, ATTN: AMSTA-MAP, Warren, MI 48090. A reply will be furnished directly to you.
